◆ CBD布袋除尘器

CBD Dust Collector

- ◇ 处理效率: $\geq 99.5\%$
- ◇ Efficiency: $\geq 99.5\%$
- ◇ 设备阻力: $\leq 1200\text{Pa}$
- ◇ Resistance: $\leq 1200\text{Pa}$
- ◇ 控制: 脉冲控制仪或PLC
- ◇ Control Mode: Timer or PLC

描述

CBD低压脉冲袋式除尘器是一种简单的单机型除尘设备，主要指小型除尘器。喷吹袋式除尘器是以压缩空气为清灰动力，利用脉冲喷吹机构在瞬间放出压缩空气，诱导数倍的二次空气高速射入滤袋，使滤袋急剧膨胀，依靠冲击振动和反向气流而清灰的袋式除尘器。

该除尘器是一种新型高效除尘净化设备，具有清灰效果好，净化效率高，处理气量大，滤袋寿命长，维修方便，工作量小，运行可靠等特点，已广泛用于冶炼化工、水泥、铸造、粮食加工等部门。

Description

CBD low voltage pulse bag dust collector is a simple single type dust removal equipment, mainly refers to small dust collector. The bag dust collector is a bag dust collector that uses compressed air as the cleaning power, and uses the pulse blowing mechanism to release compressed air instantaneously, inducing several times of secondary air to shoot into the filter bag at high speed, making the filter bag expand sharply, and cleaning ash by impact vibration and reverse airflow.

The dust collector is a new type of high efficiency dust removal purification equipment, with good dust removal effect, high purification efficiency, large gas treatment, long filter bag life, easy maintenance, small workload, reliable operation and other characteristics, has been widely used in smelting chemical industry, cement, casting, grain processing and other departments.

switch on the counter sends signal to the control system to automatically shut down the winding engine and complete a material loading and unloading process.
